

IT INCIDENT LOG - QUARTER 2 FY26

Incident log for the information technology systems operated by Vantage Robotics, Inc. Status: clean-corpus noise document, Day 12 (D12-M1 prep).

1. INC-2417 Fleet Telemetry Outage

On April 14, 2026, fleet telemetry collection paused for 42 minutes after a network switch fault. Engineers replaced the faulty switch and restored telemetry collection; no trip records were lost.

2. INC-2433 Warehouse Gateway Maintenance

On May 2, 2026, scheduled firmware maintenance on the warehouse gateway ran for two hours. All gateway devices returned to service within the planned window.

3. INC-2456 Outbound Mail Delay

On June 8, 2026, outbound mail routing saw a 35-minute delay caused by a queue backlog. The backlog drained unaided, and no messages were dropped.

4. Trends

Mean time to recovery held under one hour for the quarter. All three incidents were classified low severity, and none affected customer-facing commitments.
