

REGULATORY CORRESPONDENCE FILE

Prepared for Project Falcon due diligence of Acme Robotics, Inc. Status: scaffold seed document, Day 6 (D6-M5).

1. Permit Review

The Pittsburgh manufacturing facility holds all required operating permits; the air quality permit renewal (Permit No. AQ-2024-118) is due within ninety (90) days.

2. Market Concentration

No regulatory filing obligation arises from the market concentration of Acme in autonomous logistics orchestration; market share remains below reportable thresholds.

3. Open Matters

There is one open regulatory matter: a routine inspection follow-up letter dated June 12, 2026, with a response deadline of October 1, 2026.
